Meat contains a large amount of protein, which is beneficial in repairing / building of body tissues and the production of antibodies.

Meat is rich in iron, zinc and selenium. Iron helps in forming hemoglobin that transports oxygen to different parts of your body, zinc helps in tissue formation and metabolism as well as selenium breaks down the fat and chemicals in the body.

Vitamin A, B and D are commonly found in meat which promote good vision, stronger teeth and bones and it also support the central nervous system thus promoting mental health as well.

Another big benefit of eating meat is the maintenance of your skin's health.
