

South African Journal of Animal Science
(Official Journal of the South African Society for Animal Science)
(ISSN 0375-1589 print)
(ISSN 2221-4062 online)

Scope of the Journal

The South African Journal of Animal Science is a peer-reviewed journal for publication of original scientific articles and reviews in the field of animal science. The scope of the journal includes reports of research dealing with farm livestock species (cattle, sheep, goats, pigs, horses, poultry and ostriches), as well as pertinent aspects of research on aquatic and wildlife species. The main disciplines covered are nutrition, genetics and physiology. Papers dealing with production aspects of animal products and sociological aspects of well-defined livestock production systems are also invited, provided that they are scientific by nature and have been carried out in a systematic way.

Editor-in-chief

J.B.J. van Ryssen (e-mail: jvryssen@up.ac.za)

Guest editors of special issue

H.C. Schönfeldt and B. Pretorius

Publications Committee

J.B.J. van Ryssen, V. Muchenje, K.C. Lehloenya

The South African Society for Animal Science

Mission

Our mission is to advance animal science and promote viable animal production systems, while sustaining natural resources and the environment, and thereby to serve in the interests of human welfare.

Objectives

The objectives of the society are to promote animal science by:

- Ensuring that high standards of education, research, technology and science-based public policy are upheld with regard to animal production and animal products
- Upholding professional integrity and ethical codes
- Fostering the scientific interests and professional status of members
- Organizing symposia regularly
- Publishing a scientific journal
- Serving as mouthpiece on all matters relating to animal production and animal products in compliance with public welfare and general interest
- Liaison with other societies with similar or related interests

Membership

Membership is open to individuals in possession of a bachelor degree or a diploma in animal science/production or a related biological science field, whose activities may contribute to the scientific knowledge of animal production or to its application to agriculture. Applications for membership may be submitted electronically from the society website: <http://www.sasas.co.za>

Disclaimer

"The opinions, or conclusions, expressed in this publication are not necessarily the views of the South African Society for Animal Science. The South African Society for Animal Science accepts no responsibility for claims made in advertisements or articles on its website or in the South African Journal of Animal Science."

South African Journal of Animal Science

Contents: Volume 45 No. 3 (2015)

Special issue: Relevance of the South African Carcass Classification Systems

Editorial	
H.C. Schönfeldt & A. Jooste	227-228
Description of carcass classification goals and the current situation in South Africa	
E.C. Webb	229-233
The beef tenderness model	
L. Frylinck, A. O'Neil, E. du Toit, P.E. Strydom & E.C. Webb	234-248
Proteomics approach as a new way to predict tenderness as compared to the classical South African Beef Carcass Classification System	
K.W. Moloto, L. Frylinck, P.E. Strydom & G. Koorsen	249-254
Visual evaluation of beef tenderness by using surface structural observations and its relationship to meat colour	
K.Y. Modika, L. Frylinck, K.W. Moloto, P.E. Strydom, P.H. Heinze & E.C. Webb	255-262
Relevance of the formal red meat classification system to the South African informal livestock sector	
Z. Soji, D. Chikwanda, A.T. Chikwanda, I.F. Jaja, B. Mushonga & V. Muchenje	263-277
Associations between animal traits, carcass traits and carcass classification in a selected abattoir in the Eastern Cape Province, South Africa	
Z. Soji, S.P. Mabusela & V. Muchenje	278-288
Sources of variation in quality of South African beef: Case studies in relation to the red meat classification system	
P.E. Strydom, L. Frylinck, S.M. van Heerden, M. Hope-Jones, A. Hugo, E.C. Webb, E. Moholisa, B.E. Liebenberg & O.C. Sehoole	289-301
Fat quality of South African pigs with different carcass classification characteristics	
A. Hugo & E. Roodt	302-312
Nutrient content of South African red meat and the effect of age and production system	
H.C. Schönfeldt & N. Hall	313-324
Changes in the composition of South African red meat	
N. Hall, H.C. Schönfeldt & B. Pretorius	325-338
A consumer perspective of the South African red meat classification system	
H. Vermeulen, H.C. Schönfeldt & B. Pretorius	339-354
Proceedings of the 6th Meat Symposium: The Meat Animal and its Products. 25 April 1990	
Beef, lamb and mutton carcass classification and grading in South Africa	
R.T. Naudé, J.F.G. Klingbiel & G.G. Bruwer	S1-S15
The development of a new classification system for pig carcasses	
G.G. Bruwer, P.H. Heinze, I.B. Zondagh, A. Gee & R.T. Naudé	S16-S30
