## RHINOWATER COMPANY PROFILE

### COMPANY INTRODUCTION

Rhino Water (Pty) Ltd is part of the Rhino Group of Companies, and provides a wide range of solutions and services within the water industry.

The Rhino Group is diversified extensively through several independent companies in line with it's pivotal strategies:

FOOD-ENERGY-WATER SOLUTIONS agricultural, energy and water supply solutions

#### GREEN BUILDING SOLUTIONS

construction materials, passive design elements, energy demand mitigation & renewable energy supply as well as rainwater harvesting & waste water recycling.

RHINO)

Significant synergies exist between the various elements, thereby very often ensuring unique turnkey abilities and a solutions-centric versus product approach. Our strategic intent is deliberately encompassed through 'Partnering with Professionals' and as such we align ourselves with best local and international service providers to offer state-of-the-art solutions to the client. The Rhino Group has it's own distribution structure, with branches in Port Elizabeth, East London, Johannesburg and Cape Town, along with own warehousing capacity, as well as a network of agents throughout South Africa and a number of neighbouring countries.

SERVICES AND PROJECTS

Rhino Water designs, manufactures, installs and maintains customised plants and solutions for water harvesting, water filtration, black and grey water treatment, sludge & effluent treatment and lake & pond rehabilitation.

Clients vary from small domestic users to large industry, including factories, office blocks and shopping centres across South Africa and several African countries, as well as farms and housing developments in South Africa.

## SPECIALISED SERVICES OFFERED

Water Harvesting: catchment from roofs and paved areas into tanks and reservoirs up to two million litre capacity

Dam Liners & Floatation Covers: lining of earth dams, ponds and reservoirs, with installation of floatation covers to reduce evaporation and contamination

Filtration: sand, multimedia, carbon, ultra-filtration, water softening, extraction of contaminants and metals, Ultraviolet sterilization, Reverse Osmosis

Aquafers & Reed Bed Systems for natural filtration of water

Grey Water Systems: treatment of grey water to toilet flush or irrigation standards

Black Water Systems: treatment of black water to toilet flush, irrigation or wash water standards

Car Wash Systems for recycling of water

Remediation of ponds and lakes

Abattoir Waste Treatment: conversion of abattoir slaughter waste to wash water for re-use, thereby reducing water consumption and effluent disposal. Solutions are offered in partnership with BluePlanet SA

Sludge and Effluent Management: treatment of manure ponds (piggeries, dairies), effluent from food processors, wineries and distillers, tanneries, etc. Solutions are offered in partnership with BluePlanet SA

Ozone Applications: air quality and odour control, bacterial control

We are proud to be agents for and/or associated with the following professionals:

## WATER HARVESTING

#### Harvesting of water from:

Roofs and paved areas | Boreholes and sub-surface springs | Rivers | Sea (desalination) Containment of harvested water in tanks and reservoirs from 1000 litre to 2 million litre capacity, or dams.

#### Dube Tradeport Greenhouse And Water Harvesting

Lynnwood Bridge Water Harvesting To Toilet Flush

Water Storage 1000 Litre To 2m Litre Capacity

## DAM LINERS AND FLOATATION COVERS

Construction and installation of dam liners and floatation covers for containment of water, sludge, fertilizers, waste water etc.

Installation of geotextiles as under layer to dam liner where soil conditions require protection of the dam liner. Liners for canals and reservoirs.

#### Nieu Bethesda Waste Water Treatment Works

#### Dube Tradeport

## WATER FILTRATION

Treatment of water from boreholes, sub-surface springs, dams, rivers, industrial processes, roofs and paved areas and sea (desalination). Customised solutions to deliver water quality to client requirements, e.g. process water, irrigation or potable use.

#### Technologies:

- Sand , bag and SAF Filtration
- Ultra-filtration

Carbon filtration
Resin filtration

Lumotech

Reverse osmosis

Dube Tradeport – filtration of rain- & borehole water and sewage effluent 120m3/h

• UV

Lynnwood Bridge Water harvesting to toilet flush

Dube Tradeport 20m3/h UV sterilization

PPC

Sub-surface water treatment

## BLACK WATER SYSTEMS

Treatment of sewage | Fixed film aerated technology

## GREY WATER SYSTEMS

Treatment of grey water | Membrane filtration | Car wash systems

## AQUAFERS AND REED BED SYSTEMS

Natural filtration of water through aquafers and reed bed systems.

Selection of plant species specifically for each application based on water quality.

Natural swimming pools free from chemicals.

## REMEDIATION OF PONDS AND LAKES

Treatment of bacteria and algae in ponds and lakes using bacteria

## OZONE

Odour control | Water quality management
